EDUCATION

Chandubhai S. Patel Institute of Technology - CHARUSAT UNIVERSITY <i>B.Tech - Information Technology - CGPA - 9.20/10</i>	2022 – Present <i>Gujarat, India</i>
Shree Swaminarayan Gurukul, Surat (GSEB) <i>Higher Secondary Certificate (HSC)(PCM) - Percentage: 85%</i>	2020 – 2022 <i>Gujarat, India</i>
Shree Swaminarayan Gurukul, Surat (GSEB) <i>Secondary School Certificate (SSC) - Percentage: 87.66%</i>	2019 – 2020 <i>Gujarat, India</i>

EXPERIENCE

Intern at Laugh Logic Labs <i>Role - ML engineer</i>	May 2025 - June 2025 <i>Surat, Gujarat</i>
- Developed and deployed ML models for real-world tasks, including data cleaning, feature selection, model training, and evaluation using Scikit-Learn and TensorFlow. - Worked with developers to integrate ML models into applications using Flask and Node.js, enabling smooth data flow and real-time predictions. - Improved model accuracy and efficiency through hyperparameter tuning, cross-validation, and building optimized ML pipelines.	
IMMunoQuest: Kaggle Competition <i>Participant - 8th Rank</i>	15 feb 2025 <i>Charotar University, Gujarat</i>
Developing a deep learning-based classification model to accurately categorize white blood cells (WBCs) into five critical types.	
DoseHack'24 Hackathon Participant <i>Automation warehouse bots</i>	25-26 Sep 2024 <i>Charotar University, Gujarat</i>
- In DoseHack'24, where I developed autonomous warehouse bots to enhance operational efficiency and reduce human error. - Showcased the potential of AI/ML in revolutionizing warehouse operations.	

PROJECTS

SARColorNet CNN, ANN, GAN	January 2025
- Built a deep learning model to colorize grayscale SAR satellite images using GANs with a U-Net-based generator, achieving 80% accuracy in generating realistic outputs. - Trained on 50,000+ images, optimizing feature extraction and improving visual quality through fine-tuned architecture and loss functions. - Designed a user-friendly Streamlit UI allowing users to upload and process multiple images at once for real-time colorization.	
FarmSmart: Crop-Recommendation RF, XGBoost, SVC, Streamlit	November 2024
- Developed a machine learning-based crop recommendation system, achieving and enhancing performance to 97-99% using Random Forest and XGBoost. - Built a Streamlit web interface for real-time predictions based on Nitrogen, Phosphorus, Potassium, pH, and humidity.	

TECHNICAL SKILLS

Languages: C/C++, Python, JavaScript, SQL(MySQL 8.0)
ML Libraries: Flask, NumPy, Pandas, Matplotlib, Scikit-Learn, TensorFlow, PyTorch, NLTK, Streamlit
Developer Tools: VS Code, Git, GitHub, Power BI, Google Colab

CERTIFICATIONS

- Completed NPTEL certifications in **Data Structures and Algorithms Using Java with 80% score**, **Database Management System with 76% score**, **Operating System Fundamentals with 67% score.**
- Python for Data Science** - certification by IBM.
- Deep Learning with TensorFlow** - certification by IBM.
- Data Science** - certification by IBM.
